- Vanier North
- Vanier South
- Whitehaven – Queensway Terrace North

Mobile Vaccination Teams

- Mobile vaccination teams are providing vaccinations to congregate care settings, including shelters and homebound residents.
- **Homebound residents:** The EOC continues collaboration with partners to identify additional homebound residents to immunize them and an essential caregiver, in-home. Homebound clients can request in-home vaccination by themselves, by their caregiver, or by referral from their primary care provider by calling the OPH Vaccine Booking Line at 613-691-5505 - Option #2. **We are defining a homebound resident as:** an individual who has medical, physical, cognitive, or psychosocial needs/conditions that inhibit them from visiting a local clinic, pharmacy, or their primary care provider to receive their COVID-19 vaccination.

Request a mobile vaccination team

Workplaces, community organizations, places of worship and other groups can now request a mobile vaccination team to administer first and second doses of the COVID-19 vaccine on-site, at their own location. This can be completed online with [Ottawa Public Health's Mobile COVID-19 Vaccination Community Clinic Request Form](#).

Indigenous Clinics

- Wabano Centre for Aboriginal Health and OPH are providing first and second doses to First Nation, Inuit and Métis community members 12 and older.
 - The clinic is currently located at Rideau High School, 815 St. Laurent Blvd.
 - Contact OPH to book an appointment: 613-691-5505
- Akausivik Inuit Family Health Team is providing first and second dose vaccines to all Inuit community members 12 and older.
 - Contact Akausivik for an appointment or more information: 613-740-0999

Bruyère Vaccination Clinic

The Bruyère vaccine clinic, in collaboration with OPH, has first and second dose appointments available for eligible residents of priority neighbourhoods and other priority groups that are 12 and older. Residents can visit [Bruyere.org](https://bruyere.org) to verify eligibility and book their appointment.

Youth 12-17 Years Old

Youth aged 12 and older are eligible to receive the COVID-19 vaccine. Youth must be 12 years old or older on the day of their appointment to book online. If they are currently 11 years old but are turning 12 years old while community clinics are running, please call the Provincial booking line at 1-833-943-3900 for an appointment.

Second Doses

Vaccine Interchangeability

On June 1, 2021, the [National Advisory Committee on Immunization \(NACI\)](#) updated their recommendations on the interchangeability of COVID-19 vaccines used in Canada. This means that you could receive one vaccine for your first dose and a different vaccine for your second dose to complete your series.

While we are currently offering both Moderna and Pfizer at our community clinics, given fluctuations in our vaccine supply, we cannot guarantee a particular vaccine type for adults 18 years and older. Interchanging mRNA vaccines is safe, effective, and not a new practice. The priority is to receive two doses of a vaccine to complete the series and be fully protected. Getting the same vaccine for first and second doses or getting one vaccine for a first dose and different vaccine for a second dose (also called a “mixed schedule”), are both considered valid options. Both schedules will count as a full series.

Anyone with allergies to a vaccine, or a specific component of a vaccine must consult a physician to determine if vaccination is still possible, and if so, which vaccine is appropriate.

Accelerated Second Dose Eligibility

- All individuals 12 and older are now eligible to book or rebook their accelerated second dose appointment. The appointment will be scheduled at least 28 days after the first dose, per the recommended interval.
- **AstraZeneca:** Individuals who received AstraZeneca as their first dose can choose to either receive a second dose of AstraZeneca or an mRNA vaccine 8-12 weeks after their first dose.
 - Individuals who would like their second dose of the AstraZeneca vaccine can contact the pharmacy or primary care provider where they received their first dose.
 - Individuals opting to receive an mRNA vaccine have the option to schedule their second dose appointment at a [participating pharmacy](#), primary care provider or a community clinic.

General Information

More than 200 pharmacies across Ottawa are also receiving vaccines directly from the Province. Participating locations are available on [Ontario.ca](#). Most pharmacies book appointments ahead of time and some allow walk-ins. Eligible residents should check with the pharmacy directly. Select primary care teams are also offering vaccines.

Registering a vaccine received outside of Canada or Ontario

If you have received one or more doses of a COVID-19 vaccine outside of the Province of Ontario, you must provide your proof of immunization to OPH. [Complete the COVID-19 Out of Province Dose Documentation form](#) to notify OPH of your out of province dose administration and upload the documentation you have received.

Total doses administered

For up-to-date information on COVID-19 vaccination in Ottawa, including the number of doses administered and vaccination coverage rates, visit OPH's [COVID-19 Vaccination Dashboard](#).
